6075 CASSETTE SYSTEM

Part of the extensive range of former Nubal products for the printed circuit board industry

An aesthetically pleasing range designed to make the manufacturing process easier, reduce and simplify maintenance and greatly improve productivity

“It is our belief that the interests of both board and equipment producers are best served by establishing technology partnerships”

The 6075 Cassette system is available both as feeder and stacker and is perfect for those applications when panels may touch but not slide over each other and is suitable for both rigid and multilayer laminates. Typical uses are following pre-lamination cleaning, between exposure and Mylar removal, following tin stripping, etc. The important conditions are that panels are perfectly dry and not susceptible to moderate pressure. The economical latch-in trolleys are used to transport product between processes. A major benefit is the compactness of the panel stack, with a typical cassette load of 120 1,6 mm panels. Stack angle can be suited to the product with the lower angle available for thin product which has a tendency to buckle when stacked on edge. Particular care has been taken to ensure that double feeding does not occur and that the collected panels are stacked neatly without gaps.

- Weight – 150 kgs
- Height – Nominal 900 mm (adjustable)
- Width – 1110 mm
- Length – 1130 mm excluding trolley
- Supply – Single phase 50/60 Hz
- Air – 5 bar
- Speed – Variable 0 – 4 m/min
