

“CENTRALISER”

One of the extensive range of former Nubal products for the printed circuit board industry

An aesthetically pleasing range designed to make the manufacturing process easier, reduce and simplify maintenance and greatly improve productivity

“It is our belief that the interests of both board and equipment producers are best served by establishing technology partnerships”

The Muscat *CENTRALISER* offers a number of benefits around the PCB shop. Apart from what is probably the main benefit of presenting an orderly stack on a following collector to eliminate scuffing damage caused by manual shuffling of panels, it can also be used prior to processes such as dry film lamination and PISM coating where accurate registration of the panel is important. Other versions include the Edge Aligner which moves panels to a fixed side lay and the Brushmiser which staggers panels alternately across the conveyor width to maximise brush life in rotary brushing machines.

- Weight – 80 kgs
- Height – Nominal 900 mm (adjustable)
- Width – 1080 mm
- Length – 760 mm
- Supply – Single phase 50/60 Hz
- Air – 5 bar
- Speed – Variable 0 – 5 m/min
