

"COMPACT,, PROCESS LINES

Part of the extensive range of former Nubal products for the printed circuit board industry

An aesthetically pleasing range designed to make the manufacturing process easier, reduce and simplify maintenance and greatly improve productivity

"It is our belief that the interests of both board and equipment producers are best served by establishing technology partnerships"

The 'COMPACT' process lines are designed to provide a cost effective choice for the smaller scale requirement and there are models suitable for developing, etching, chemical cleaning, the stripping of resist films and tin or tin-lead. Built as the full size modular range of process lines from heavy gauge beige polypropylene, these robust units are equally at home in production environments or in prototype and research shops. Ease of maintenance is a primary consideration and a range of options is available including thin material transport system. The standard unit consists of an entry conveyor, process chamber, 2 stage rinse section, a highly effective dryer and an exit conveyor. Fume extraction points are provided over the entry slot and from the drying section. Toughened glass lids open from front and rear of the machine with inner covers to the spray sections.

- Working height – Nominal 900 mm with adjustable feet
- Working width – 650 mm
- Module depth – 928 mm (1128 for film stripper)
- Module length – 1960mm or 2140mm
- Supply – 3 phase 50/60 Hz
- Speed – Variable AC inverter controlled up to 1,5 m/min
- Minimum panel size – 150 mm x 100 mm
- Double process lids
