The *E-3000 Series* is the new, high quality, high technology handling system from Nubal. Built without compromise, the range currently includes a flat loader particularly suitable for the feeder of thin materials, available with or without integral tacky roll cleaner and in both tray and trolley feeding versions. A similarly specified collector is also available as are additional carts and trays.

All models are PLC controlled, have traffic light status display and are finished in RAL 7032 as standard although others colours can be had to special order.
